

# TULIP TREE

**MATURE FORM**

**JUST PLANTED**

**FORM**

**HEIGHT** 50 feet  
**WIDTH** 30 feet  
oval to conical crown with upright, spreading branches

**LEAF**

simple, bright green, rounded to oblong (tulip-shaped), four lobes and a notched to flat top with smooth edges; emerge in spring

**FALL COLOUR**

golden yellow

**BARK**

smooth, light grey-green when young; dark grey ridges with white furrows in diamond patterns when mature

**FLOWER**

large, yellow-green with orange insides, showy, cup-shaped (tulip-like); emerge in early summer; flowers may take up to 10 years to develop after planting

**FRUIT**

small, brown, dry, oblong, cone-like clusters of winged samaras; mature in late summer/early fall
